Functional composition of the metalloproteome
78 proteins, eggNOG-mapper COG categories
Amino acid, nucleotide and coenzyme metab.
17 (22%)
General and unknown function
14 (18%)
Energy and carbohydrate metabolism
13 (17%)
Cell envelope, division and defense
10 (13%)
Transcription, replication and repair
9 (12%)
Translation and ribosome
8 (10%)
Inorganic ion transport
7 (9%)
